INDEX TO VOLUME 10: 1988

AUTHOR

Bayle, A J Security in open system networks: a tutorial survey 131
Becker, H Secure access control and MAC-based signatures 20
Davies, D Computer insurance: the gaps 13
Dilloway, C Avoiding litigation or arbitration 17
Fraim, J L and Webber, G E Evolution of the computer security market 33
Friedberg, A, Harper, R and Cerullo, M Reliance on optical fibres to increase telecommunication security 73
Friedman, M Access-control software 157
Gilbert, G N The Alvey DHSS Demonstrator project: applying intelligent knowledge-based systems to social security 113
Greguras, F M and Merges, R P Impact on the FCC radio frequency interference regulations on the marketing of computing devices 240
Gustoff, M E and Sexton, T J Personal computer security 195
Karren, D T Typical system access control problems and solutions 23
Katz, J E Public policy origins of telecommunications privacy and the emerging issues 169
Kielsky, M Security and access control features of the VAX/VMS operating system 203
Knowles, T Security, OSI and distributed systems 79
Knox, M and Bowden, E Unix system security issues 67
Kraemer, K L and Kling, R Political character of computerization in service organizations: citizen interests or bureaucratic control 229
Krayem, R Smart cards: a new tool for identification and access protection 85
Magnusson, C Introducing knowledge-based systems in the Swedish social insurance organization 103
McLeod, K Computer insecurity 89
Pangalos, G Design of computer-based information systems for the Greek local government 94
Reidenberg, J Information property: some intellectual property aspects of the global information economy 3
Reisinger, D A Access control methods of VAX/VMS 162
Roberts, W 'Remember to lock the door': MMI and the hacker 146
Satya, V Secure computer network requirements 211
Schartum, D W Introduction of information in social insurance institutions: political objectives and organizational consequences, history and future 107
Sizer, R Data, information and networking 223
Straub, D W and Nance, W D Uncovering and disciplining computer abuse: organizational responses and options 151
Susoeff, Y Disaster recovery planning 39
Zimmerman, R Harnessing information for development 101

TITLE

Access control methods of VAX/VMS **Reisinger, D A** 162
Access control software **Friedman, M** 157
Avoiding litigation or arbitration **Dilloway, C** 17
Computer insecurity **McLeod, K** 89
Computer insurance: the gaps **Davies, D** 13
Data, information and networking **Sizer, R** 223
Design of computer-based information systems for the Greek local government **Pangalos, G** 94
Disaster recovery planning **Susoeff, Y** 39
Evolution of the computer security market **Fraim, J L and Webber, G E** 33
Harnessing information for development **Zimmerman, R** 101
Impact on the FCC radio frequency interference regulations on the marketing of computing devices **Greguras, F M and Merges, R P** 240
Information property: some intellectural property aspects of the global information economy **Reidenberg, J** 3
Introducing knowledge-based systems in the Swedish social insurance organization **Magnusson, C** 103
Introduction of information in social insurance institutions: political objectives and organizational consequences, history and future **Schartum, D W** 107
Personal computer security **Gustoff, M E and Sexton, T J** 195
Political character of computerization in service organizations: citizen interests or bureaucratic control **Kraemer, K L and Kling, R** 229
Public policy origins of telecommunications privacy and the emerging issues **Katz, J E** 169
Reliance on optical fibres to increase telecommunication security **Friedberg, A, Harper, R and Cerullo, M** 73
'Remember to lock the door': MMI and the hacker **Roberts, W** 146
Secure access control and MAC-based signatures **Becker, H** 20
Secure computer network requirements **Satya, V** 211
Security and access control features of the VAX/VMS operating system **Kielsky, M** 203
Security in open system networks: a tutorial survey **Bayle, A J** 131
Security, OSI and distributed systems **Knowles, T** 79
Smart cards: a new tool for identification and access protection **Krayem, R** 85
The Alvey DHSS Demonstrator project: applying intelligent knowledge-based systems to social security **Gilbert, G N** 113
Typical system access control problems and solutions **Karren, D T** 23
Uncovering and disciplining computer abuse: organizational responses and options **Straub, D W and Nance, W D** 151
Unix system security issues **Knox, M and Bowden, E** 67

SUBJECT

Calendar 62, 127, 192, 256
Conferences 243
News 57, 123, 180, 247
News — market forecasts 123, 189, 253
Product review 41
Publications 48, 178, 245
